

Ampere API Specification

August 21, 2023

Contents

1	Introduction	1
----------	---------------------	----------

1 Introduction

This document lays out the structure of the Ampere API. There are several main components.

- Data types
- Record types
- Data structure and record structure creation functions
- Frontend summarization
- AI-facing summarization
- FHIR bridging API
- Database bridging API
- AI bridging API
- Remote bridge API which abstracts away the above bridging APIs
- Backend Server API interface
- Diagnostics and monitoring API interface
- App updating procedure

2 Data and Record Types

The data and record types define how we store and retrieve data.
